

Henry

Hi LHS,

Henry is doing really well in his new home! We adopted him in December 2008 and decided to keep the name that you gave him. He is truly a unique cat. Instead of hiding under the bed like most cats would do when you first bring them home, Henry just marched right into our living room and plopped on the couch, letting us know that he was in the right place. He is very playful and especially loves feather toys and string. Henry is also quite adventurous and likes to launch aerial attacks on our dog. He is always first in line when it's time for food. Sometimes, he'll even jump up and knock the food out of your hand before you've had the chance to put anything in his bowl. Despite his crazy antics, Henry is an affectionate cat and we can't imagine not having him around. Thank you!

Nicole J.
