

About Our Programs

Humane education is the process by which one learns to value, respect and care about the people, animals and environment around them. All of our lessons are based on these and other character concepts, such as safety, citizenship and personal responsibility. Choose from a variety of topics that could fit into your current curriculum and may also match Colorado Model Content Standards for science, reading, civics and more.

Our educational programs last about one hour and are free of charge to the public. Our programs are offered to children from the 1st grade and up. Our Humane Educator will come to your school (with live animals if appropriate). A teacher is required to be present during the presentation.

We do accept monetary donations for this service, which will go toward the care we provide to the homeless animals in our community. If your group would like to collect supplies to help Larimer Humane Society, please view our wish list .
